Leana-

Attached is a memorandum put together by CH2M Hill after our conversations with RTC regarding mercury deposition and then Methylation in the Southern project area. Please let me know if you have any comments on this document.

I have not had an opportunity to review materials or make head way on the permit decision. I received temporary (120 days) help in my office last week that will allow me to do the review necessary to move forward, I anticipate a decision by mid June.
